

JAGESH RANJAN SHARMA

Power BI Developer | Business Intelligence Analyst | Data Analyst

Noida, India | Phone: 8840710946 | Email: Jranjan.sharma89@gmail.com | LinkedIn: [linkedin.com/in/jagesh-ranjan-sharma](https://www.linkedin.com/in/jagesh-ranjan-sharma)

PROFESSIONAL SUMMARY

Results-driven Power BI Developer and Data Analyst with 5 years of experience delivering business intelligence, reporting automation, and KPI-driven analytics solutions across telecom and manufacturing domains. Skilled in Power BI, SQL, Power Query, Excel, and data modeling with strong expertise in dashboard development, ETL transformation, business reporting, and stakeholder management. Proven ability to improve reporting efficiency, enhance data accuracy, and support data-driven decision-making through scalable BI solutions.

TECHNICAL SKILLS

Power BI & Business Intelligence

- Power BI Desktop
- Power BI Service
- DAX
- Data Modeling
- Dashboard Development
- KPI Reporting
- Drill-through Reports
- Row Level Security (RLS)

Data Transformation & ETL

- Power Query
- ETL Automation
- Data Cleaning
- Data Validation
- Data Transformation

SQL & Database

- SQL
- SQL Server
- SSMS
- Joins
- CTEs
- Subqueries
- Window Functions

Analytics & Reporting

- Business Analysis
- Trend Analysis
- Forecasting
- Root Cause Analysis
- Operational Reporting
- Performance Reporting

Other Tools

- Excel
- Pivot Tables
- VLOOKUP/XLOOKUP
- Python (Pandas, NumPy)

PROFESSIONAL EXPERIENCE

Production Planning & Data Analyst | Dixon Technologies | Noida, India | Jun 2025 – Feb 2026

- Built Power BI dashboards for production planning, dispatch tracking, inventory visibility, and capacity utilization monitoring.
- Integrated production and dispatch datasets using SQL and Power Query to improve planning visibility and operational tracking.
- Automated MIS reporting workflows, significantly reducing manual data preparation effort and reporting turnaround time.

- Developed KPI reporting frameworks for OTIF, production achievement, utilization, backlog aging, and dispatch performance.
- Worked with planning and operations teams to identify reporting gaps and improve data-driven operational monitoring.
- Performed data validation and reporting reconciliation to ensure reporting accuracy and consistency across operational reports.

Data Analyst | BT Group | Gurgaon, India | Mar 2021 - Apr 2025

- Developed and maintained enterprise Power BI dashboards for SLA monitoring, operational KPIs, customer metrics, and service performance reporting.
- Automated recurring reporting processes using Power Query and SQL, reducing manual reporting effort by approximately 40%.
- Performed SQL-based data extraction, transformation, and validation across large operational datasets to support business reporting and analytics.
- Designed interactive dashboards with drill-through analysis, trend monitoring, and dynamic KPI calculations using DAX.
- Collaborated with cross-functional stakeholders to gather reporting requirements and deliver actionable insights for operational decision-making.
- Improved reporting accuracy to ~99% by implementing validation checks, reconciliation logic, and standardized KPI definitions.
- Supported dashboard optimization, scheduled refresh management, and report enhancement activities in Power BI Service.
- Delivered business-critical reports and dashboards for operational tracking, customer analytics, and management reporting.

KEY PROJECTS

Telecom Customer Metrics Analytics

- Analyzed customer usage, SLA performance, and revenue trends using SQL and Power BI to identify churn indicators and operational gaps.
- Developed interactive dashboards with dynamic DAX measures for KPI tracking, trend analysis, and month-over-month performance comparison.
- Automated SQL-based reporting and data transformation processes using Power Query, improving reporting efficiency and data consistency.
- Designed KPI frameworks for customer performance, service availability, fault resolution, and operational reporting.

Sales Performance & Revenue Trend Analysis

- Developed interactive Power BI dashboards to analyze sales performance, revenue trends, regional contribution, and product-level profitability.
- Used SQL and Power Query to clean, transform, and integrate sales datasets from multiple sources for centralized reporting.
- Created DAX measures for YoY growth, MoM trend analysis, revenue variance, profit margin, and target vs actual performance tracking.
- Designed dynamic KPI visualizations, drill-through reports, and trend analysis dashboards to support business decision-making.
- Identified top-performing products, low-performing regions, and seasonal sales patterns through data-driven analysis.
- Automated reporting workflows and dashboard refresh processes, reducing manual reporting effort and improving reporting consistency.

EDUCATION

- Bachelor of Technology (B.Tech) - United College of Engineering and Research | Aug 2015 - Jul 2019

ACHIEVEMENTS

- Reduced reporting turnaround time by up to 40% through reporting automation and centralized dashboard solutions.
- Improved reporting accuracy to approximately 99% through validation checks and data reconciliation processes.
- Delivered multiple business-critical dashboards supporting and management-level reporting.
